#### MUNICIPAL BY-LAWS.

##### CORPORATION OF DELTA.

##### BY-LAW No. 149.

A By-law to provide for adapting certain Drainage or Dyking Works in the Municipality of Delta to Irrigation and Water-supply Purposes, and for borrowing on the Credit of the Municipality the sum of Three Thousand Dollars (\$3,000) for completing the same.

Provisionally adopted the 14th day of February, 1931.

**W**HEREAS two-thirds of the owners of land situate within such portion of the area of the municipality as will be benefited by the proposed works, and representing at least two-thirds in value of the assessed lands within such area, have petitioned the Council of the Corporation of Delta, praying that the Council do take such steps and proceedings as are necessary for the irrigation of the lands situate within said Municipality of Delta, and described as follows:—

Commencing at the intersection of the northerly boundary of Crescent Slough and the westerly boundary, produced northwardly, of a 1-acre portion, according to Sketch 3540, of District Lot 139, Group 2, New Westminster District; thence south and following the said westerly boundary of westerly boundary of 25-acre portion, according to Sketch 635, to the centre line of the Ladner Trunk Road; thence west and following the said centre line to the north-west corner of the Fractional North-west Quarter of Section 35, Township 5, New Westminster District; thence south and following the westerly boundary of said Fractional North-west Quarter of Section 35 to the northerly boundary of District Lot 516, Group 2, New Westminster District; thence west and following the said northerly boundary to the north-east corner of said District Lot 516; thence south and following the quarter-section line in Sections 35 and 26 to the centre line of the Parmiter Road; thence west and following the said centre line to the centre line of Victory Road; thence south and following the said centre line to the centre line of the Farrell Road; thence east and following the said centre line to the centre line of the Goudy Road; thence south and following the said centre line to the average high-water mark of Boundary Bay; thence north-east-

wardly and following the average high-water mark to the centre line of the Tasker Road; thence north and following the said centre line to the centre line of the Ladner Trunk Road; thence west and following the said centre line to the easterly boundary of District Lot 137; thence north and following the said easterly boundary to the north-east corner of said District Lot 137; thence west and following the northerly boundary of said District Lot 137, and said northerly boundary produced, to an intersection with the northerly boundary of Crescent Slough; thence westwardly and following the said northerly boundary to the point of commencement:

And whereas thereupon the said Council procured an examination to be made by Donald J. McGugan, being a person competent for such purpose, of the said locality proposed to be adapted for irrigation and water-supply purposes, and has also procured plans and estimates of the work to be made by the said Donald J. McGugan and an assessment to be made by him of the lands to be benefited by such irrigation-works, stating as nearly as he can the proportion of benefit which, in his opinion, will be derived in consequence of such irrigation-works by every lot or portion of lot, the said assessment so made being the assessment hereinafter by this by-law enacted to be assessed or levied upon the lots and parts of lots hereinafter in that behalf specially set forth and described, and the report of the said Donald J. McGugan in respect thereof and of the said irrigation-works being as follows:—

NEW WESTMINSTER, B.C.,  
January 30th, 1931.

*J. P. Smith, Esq., C.M.C.,  
Corporation of Delta,  
Ladner, B.C.*

DEAR SIR,—In accordance with your instructions, I have made an examination of the district bordering on the Goudy and Benson Roads with a view to determining the possibility of irrigating this section, and find that the scheme is quite feasible. There are already gates on the flood-boxes in Green Slough and in the Chilukthan Slough at Ladner to allow the river-water to enter these sloughs and to prevent it from running out. There is also a dam with gates at the corner of the Benson and Ladner Trunk Roads to impound the water in the ditches above.

By building another dam in Crescent Slough, slightly east of the Goudy Road, it will be possible to raise the level of the water in Crescent Slough west of this dam, so that the ditches along the Goudy Road, south of Crescent Slough, and their lateral ditches will fill with water, and at the same time obviate the possibility of flooding any low-lying land along Crescent Slough, east of the Goudy Road. As the land between the Benson and Tasker Roads is so distant from the main supply it will be necessary to have a pump operating at the corner of the Ladner Trunk and Benson Roads. It will also be very necessary that the gates in the Chilukthan Slough at Ladner be operated at the same time as the others, in order that Chilukthan Slough and also the Chilukthan cross-ditch shall be full of water. The success of this scheme depends largely on having these sloughs full, as otherwise a great deal of this water is going to run into the Chilukthan drainage area, and in addition to being lost will cause a great loss of elevation in all points distant from the source of supply. It is also necessary because, on account of the width of the Chilukthan cross-ditch, the water at the junction of the Chilukthan cross-ditch and the Goudy Road will be the same elevation practically as the Crescent and Chilukthan Sloughs. This feature is very important and the assessment has been prepared with this in mind.

In the operation of this scheme it will be necessary to commence letting the water in on the land as soon as possible in order to have it lying still in the ditches, so that the distant points may have an opportunity to have a share of the water. It cannot be expected that the portions near Boundary Bay can have the same benefit, partly because the land is higher, and partly because the ditches, being narrow and with grass and weeds, will not conduct the water.

The estimated cost of the dam in Crescent Slough has been based on the assumption that it will be constructed when the water in the slough is low, the said estimated cost being as follows:

Cost of dam across Crescent Slough..	\$1,195.00
Cost of pump, etc., at corner of Ladner Trunk and Benson Roads	900.00
Engineering, maintenance, cost of by-law, and contingencies	905.00
	<u>\$3,000.00</u>

The scheme will be a benefit to the Chilukthan Slough irrigation area, in that the water from Chilukthan Slough will not flow away from its area, and the object for successful irrigation in the Delta is to lessen the flow as much as possible. With the water flowing fast, it will be found that the water is too high on the land near the source of supply and too low on the land distant from the same source. Likewise the Chilukthan Slough irrigation area, if worked in a similar manner, will be a benefit to this area. Thus the two schemes will work hand in hand.

The life of these works, including the pump, will be ten years. On account of the relatively small assessment per acre for this work, I believe that two-year bonds should be issued so that this may be paid off in two years.

The entire cost of this scheme will be borne by the owners within the benefited area. The right-of-way of the Great Northern Railway and the roads in this area receive no benefit from this scheme whatever.

I believe these proposed works will return much greater benefit to the land than the cost that is entailed.

Thanking you, I have the honour to be,

Your obedient servant,

D. J. MCGUGAN.

And whereas the said Council is of opinion that the irrigation-works referred to in said report are desirable:

Be it therefore enacted by the said Municipal Council of the Corporation of Delta, pursuant to the provisions of the "Municipal Act":—

1. That the said report, plans, and estimates be adopted and the said irrigation-works and the works connected therewith be made and constructed in accordance therewith.

2. That the Reeve of the said Corporation of Delta may borrow on the credit of the Corporation of Delta the sum of three thousand dollars (\$3,000), being the funds necessary for the work, and may issue debentures of the Corporation to that amount in sums of not less than one hundred dollars (\$100) each and payable within two years from the date thereof, with interest at the rate of five and one-half per cent. (5½%) per annum; that is to say, in two equal annual instalments together with interest thereon payable half-yearly on the thirtieth day of September and March in each and every year until the maturity of said debentures; such debentures to be payable at the Royal Bank of Canada at Ladner, in the Province of British Columbia; Toronto, in the Province of Ontario; Montreal, in the Province of Quebec; or the City of London, England, or the City of New York, in the United States of America, and to have attached to them coupons for the payment of interest.

3. That for the purpose of paying the sum of three thousand dollars (\$3,000), being the amount charged against the said lands to be benefited as aforesaid, other than lands belonging to the municipality, and to recover interest thereon for two years at the rate of five and one-half per cent. (5½%) per annum, the following special rates over and above all other rates shall be assessed and levied upon the undermentioned lots and parts of lots; and the amount of the said special rates and interest assessed as aforesaid against each lot or part of lot respectively shall be divided into two equal parts, and one of such parts shall be assessed and levied as aforesaid in each year for two years after the final passing of this by-law during which the said debentures have to run:—
